

# Aquais Compact yet complete

**ERICA**

### A compact yet complete cooler

The Aquais cooler connects directly to mains water and supplies ambient, cold and sparkling water. Ideal for use at home and in the office.

### Great delivery capacity

Aquais can offer a continuous supply of up to three carafes of cold and sparkling water. A surprising output, particularly given its just 24 cm wide.

### A patented cooling chamber

Aquais uses the exclusive Silver Turbo Clean system which generates a water vortex on the internal walls whenever water is dispensed so preventing biofilm formation.

The sealed cooling chamber is made of stainless steel welded together with silver, a material chosen for its

well-known sanitising and antibacterial properties. Every Silver Turbo Clean system is individually tested to 100 bar.

### A professional carbonation system

Aquais comes with a patented professional carbonation system as standard. The entire system is made of stainless steel with no plastic components making it highly durable and reliable.

CO<sub>2</sub> levels can be easily regulated according to preference.

### Noiseless at every stage of operation

Aquais is recognised for its silent running at every stage of operation, both cooling and carbonating. This is the result of well-considered design and the purposeful selection of only the highest quality components.

### STANDARD ACCESSORIES

- microprocessor to monitor product maintenance (dispensing times and months of operation)
- stainless steel external casing
- entirely stainless steel professional carbonator with easy regulation of CO<sub>2</sub> levels

### OPTIONAL ACCESSORIES

- CO<sub>2</sub> reducer
- CO<sub>2</sub> bottle
- head for filter cartridge
- filter cartridge
- kit for connection to a cooler bottle to be independent of mains water
